**AMAZING
FORCED PERSPECTIVE
EXAMPLES (+ TIPS)**

Introduction

Forced perspective is a photography technique that creates an illusion of depth or size in a photograph.

This is achieved by manipulating the way objects are positioned in relation to each other and the camera.

Forced perspective can be used to make objects appear larger or smaller than they actually are, or to create other interesting visual effects.

Here the "Tutu Flower"
has been used in an
imaginative manner

History of Forced Perspective

Forced perspective is an ancient technique that has been used by artists and photographers for centuries.

Some of the most famous examples of forced perspective include the paintings of the Renaissance masters, such as Leonardo da Vinci and Michelangelo.

In the 19th century, photographers began to experiment with forced perspective, and the technique has become increasingly popular in recent years.

Tips for Creating Forced Perspective

Here are a few tips for creating great forced perspective photos:

- Use a tripod to keep your camera steady.
- Use a wide-angle lens to exaggerate the perspective.
- Experiment with different angles and distances.
- Use a shallow depth of field to isolate your subjects.
- Use natural light to create a soft and diffused effect.
- Use a long exposure to create a sense of movement.

45 Creative Forced-Perspective Photos

By Aritra Roy. in Photography. Updated on December 15, 2019.

Forced perspective photography is used make us, the viewers believe that certain objects are smaller or larger than they really are. It's the manipulation of the human visual perception; some call it optical illusions.

100+ Funny Photos Taken At Unusual Angle [Humor]

They say a picture is worth a thousand words, but sometimes this ain't exactly right. Distance overlapping, positions,...

[Read more](#)

Balanced

This illusion has been achieved just by playing with the distance.

The second illusion you see here is that the girl is slightly heavier than the guy.

Beautiful Portrait

A beautiful photo achieved simply with the help of the right distance and a photo frame.

(Source: [Kelleigh Strange](#))

Clearing The Rocks

The rock is actually quite big, it's the photographer's distance from it that makes it look small.

(Source: [With Hope](#))

Dirty Giant Feet

This almost looks like a scene from a fantasy movie. You can create such an effect with other objects too.

(Source: [Mr. Flibble](#))

God's Canvas

Sky and clouds can be an awesome canvas for creative photos.

(Source: [Delacorr](#))

Wonderful Fountain

Once again, great use of a beautiful background the photo makes it look like the woman is splashing the fountain.

Creative with light, Shade and Colour

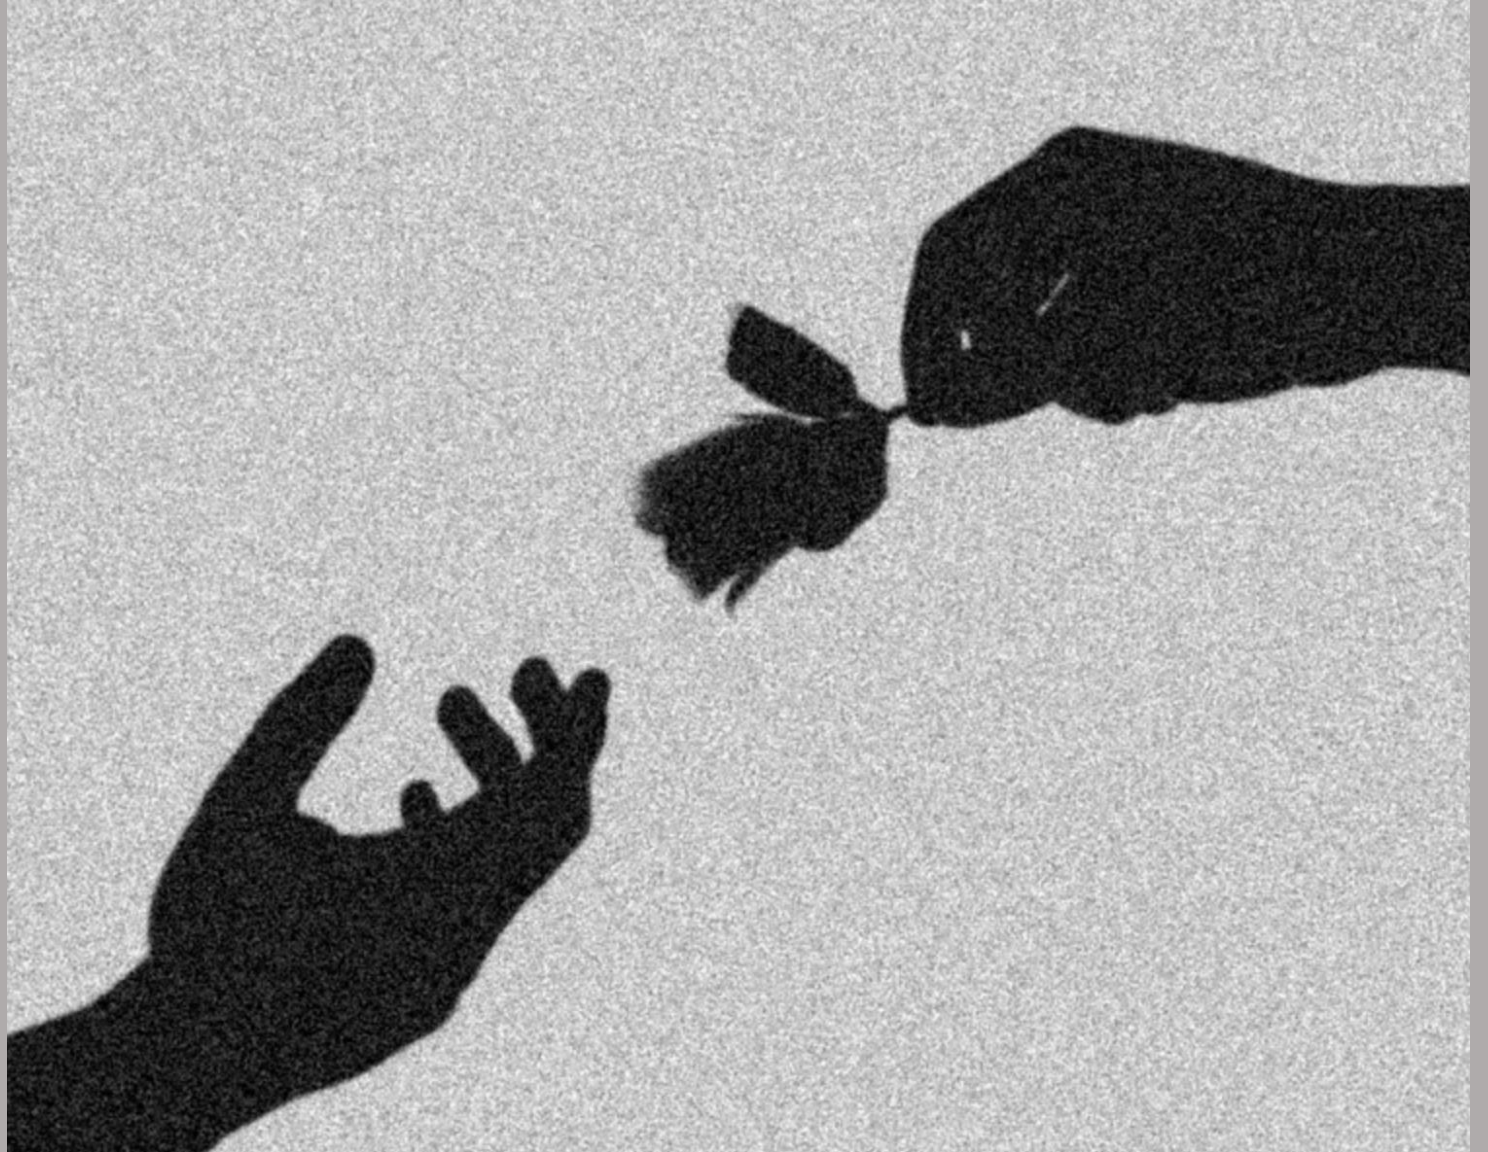

**Light and shade
is often attractive**

Two hands and flower

Where one hand gives
the other a flower has
strong emotional
appeal”

By Kim Moseley

Colour, Patterns Shadows

An attractive photo.

However, it is not a creative one as the photographer has not arranged any of the image elements.

Droplets of water
above multi-coloured
background

How might one place
the droplets on the
clear glass pane?

Correct Timing

Might need multi-shot feature of the camera.

Or perhaps make a mini-movie and select one of the frames

Multiplicity Photograph – Three separate exposures

Multiplicity Photograph – three photos are now combined

Hint 1:

Take three
separate photos

Hint 2:

Need tripod

Hint: 3:

Ask Mr Google on
how to put the
images together.
